

Jasmine Sayed

Product Designer

Seattle, WA | (925) 964-0587 | sayedjasmine@gmail.com | [linkedin.com/in/sayedjasmine](https://www.linkedin.com/in/sayedjasmine) | jasminesayedportfolio.com

Product designer making complex, technical, and AI products feel usable. I run the research, design end to end, and build in code, from an 11,000-model AI platform at Microsoft to an accessibility library I coded, live in six languages. *Open to relocation.*

EXPERIENCE

UX Designer & Researcher, Microsoft

Jan 2026 – Jun 2026

Sponsored graduate project · Microsoft CoreAI (Foundry) · UW HCDE · Redmond, WA

- Cut search-to-select time ~58% in round-two usability testing by redesigning model discovery for Microsoft Foundry's 11,000+ model catalog, conceiving and wireframing region filtering and a deeper compare tray on a five-designer team.
- Reprioritized the Agent Builder roadmap by leading usability research across 8 moderated sessions, where all 8 participants hit the same Severity-4 blocker; delivered 5 severity-ranked findings with that blocker at the top.
- Delivered region-filter and compare-tray recommendations that Foundry's own team carried forward after our engagement; both are visible in the product today.

Design & Operations Associate, University of Washington Children's Center

Sep 2025 – Present

Part-time · Seattle, WA

- Built and own the center's Figma design system (type scale, color, reusable components) that other staff now design from, shipping on-brand newsletters, flyers, and campaign posters every week.

AI Product Design Intern, DevSpot

Jun 2025 – Sep 2025

Internship

- Shipped a validated 1:1 and group messaging flow that cut support tickets from 6 to 0-1, designing it end to end and resolving threading and timestamp hierarchy through think-aloud testing.
- Enabled engineers to build straight from Figma without clarification meetings by auditing and rebuilding DevSpot's design system, annotating each component inline (sizes, states, variables).

UX Designer, Iter8 Design Lab

Mar 2023 – Jun 2025

Contract

- Built 15+ prototypes across 8 client engagements (including AWS and Conspire Commerce), spanning enterprise, e-commerce, gaming, and nonprofit; repeat and referred clients drove new work.

KEY PROJECTS

Nox+ — Privacy-First Identity Verification

Project Lead

- Lifted task success from 63% to 95% (SUS 86, n=8) with a redaction-first flow, after cutting two of our own AI features users said they wouldn't trust; led a 4-person team through a 96-person survey, 16 interviews, 2 contextual inquiries.

Saksham — Inclusive EdTech for Neurodivergent Learners

Sole Designer, Researcher & Developer

- Shipped a live, accessible reading library in six languages for neurodivergent learners, coded end to end (HTML/CSS/JavaScript); field-tested in an Indian classroom, published in the TAGA 2026 Journal, and still expanding.

Nexstera Tech — Climate-Tech Investor Site

UX Designer · Iter8

- Cut site-wide bounce 34% and tripled meeting requests in the first quarter by restructuring the investor site into story-driven flows and shipping the design system the team still builds on; launched ahead of a \$65K seed round.

LEADERSHIP & ACTIVITIES

- **UXFest SLO** — President (2024–2025), Events & Experience Director (2023–2024), Multimedia Officer (2022–2023): grew Cal Poly's UX hackathon to 140+ participants year over year, secured sponsorship, and managed 50 members.
- **Lead Researcher, UW HCDE** — Led a 4-person mixed-methods code-switching study (interviews, observation, thematic analysis); UX researcher on MomSAFE at Cal Poly, presented at the CHI 2025 Student Design Competition.
- **UX/UI Designer, Hack4Impact** — Designed 2 full-stack nonprofit apps (GoSee Foundation, Central Coast Coalition) with engineers and PMs.
- **1st Place, Figma Make Hackathon** — Best Game Mechanics (2025).

EDUCATION

M.S., Human Centered Design & Engineering — University of Washington

Sep 2025 – Jun 2027 (Expected)

B.S., Graphic Communication (UX/UI Design) — Cal Poly, San Luis Obispo

Sep 2022 – Jun 2025

SKILLS

UX Design: End-to-End UX, AI Product Design, Interaction Design, Information Architecture, Wireframing, User Flows, Prototyping, Mobile App Design, Visual Design, Design Thinking

Research & Testing: Usability Testing, User Interviews, Mixed-Methods Research, Research Planning & Synthesis, Thematic Analysis, Personas, Journey Mapping, Contextual Inquiry, Survey Design, Competitive Analysis, Heuristic Evaluation

Systems & Front-End: Design Systems, Component Libraries, Style Guides, Design-to-Engineering Handoff, Accessibility (WCAG 2.1), Responsive Design, Front-End Development (HTML, CSS, JavaScript)

Tools: Figma, FigJam, Adobe Creative Suite, Webflow, Cursor, Maze, UXtweak, UserTesting, Qualtrics, Dovetail, Miro, Notion
