

Jasmine Sayed

Product Designer

San Francisco Bay Area | (925) 964-0587 | sayedjasmine@gmail.com | [linkedin.com/in/savedjasmine](https://www.linkedin.com/in/savedjasmine) | jasminesayedportfolio.com

Product designer making complex, technical, and AI products feel usable. I run the research, design end to end, and build in code, from an 11,000-model AI platform at Microsoft to a climate-tech investor site. *Open to relocation.*

EXPERIENCE

UX Designer & Researcher, Microsoft

Jan 2026 – Jun 2026

Sponsored graduate project · Microsoft CoreAI (Foundry) · UW HCDE · Redmond, WA

- Cut search-to-select time ~58% in round-two usability testing by redesigning model discovery for Microsoft Foundry's 11,000+ model catalog, conceiving and wireframing region filtering and a side-by-side compare tray on a five-designer team.
- Reprioritized the Agent Builder roadmap by leading usability research across 8 moderated sessions, where all 8 participants hit the same Severity-4 blocker; surfaced that plus 5 ranked issues for the team.
- Built an HTML prototype to communicate the team's ideas, giving stakeholders and engineers an easy, tangible picture of what the experience should look like.

Design & Operations Associate, University of Washington Children's Center

Sep 2025 – Present

Part-time · Seattle, WA

- Keep the center consistent and on-brand across weekly newsletters, flyers, and campaign posters by owning its Figma design system (type scale, color, reusable components) on a fast weekly cadence.

AI Product Design Intern, DevSpot

Jun 2025 – Sep 2025

Internship

- Shipped a validated 1:1 and group messaging flow to engineering, designing it end to end and resolving threading and timestamp hierarchy through think-aloud testing.
- Enabled engineers to build straight from Figma without clarification meetings by auditing and rebuilding DevSpot's design system, annotating each component inline (sizes, states, variables).

UX Designer, Iter8 Design Lab

Mar 2023 – Jun 2025

Contract

- Delivered 15+ prototypes across 8 client engagements (including AWS and Conspire Commerce), spanning enterprise, e-commerce, gaming, and nonprofit.

KEY PROJECTS

Nox+ — Privacy-First Identity Verification

Project Lead

- Lifted task success from 63% to 94% (SUS 86, n=8) with a redaction-first verification flow, after leading a 4-person team through mixed-methods research (survey n=96, 16 interviews, 2 contextual inquiries).

Saksham — Inclusive EdTech for Neurodivergent Learners

Sole Designer, Researcher & Developer

- Shipped a live, accessible reading library for neurodivergent learners, designed, built, and coded end to end (HTML/CSS/JavaScript); field-tested in an Indian classroom and published in the TAGA 2026 Journal.

Nexstera Tech — Climate-Tech Investor Site

UX Designer · Iter8

- Cut investor bounce 34% and tripled meeting requests in the first quarter by restructuring the startup's investor site from one overloaded page into focused, story-driven flows.

LEADERSHIP & ACTIVITIES

- **President, UXFest SLO** — Led Cal Poly's UX hackathon (140+ participants) and managed 50 members across events, design, multimedia, finance, and marketing.
- **UX/UI Designer, Hack4Impact** — Designed 2 full-stack nonprofit apps (GoSee Foundation, Central Coast Coalition) with engineers and PMs.
- **1st Place, Figma Make Hackathon** — Best Game Mechanics (2025).

EDUCATION

M.S., Human Centered Design & Engineering — University of Washington

Sep 2025 – Jun 2027 (Expected)

B.S., Graphic Communication (UX/UI Design) — Cal Poly, San Luis Obispo

Sep 2022 – Jun 2025

SKILLS

UX Design: End-to-End UX, Interaction Design, Information Architecture, Wireframing, User Flows, Prototyping, Visual Design

Research & Testing: Usability Testing, User Interviews, Research Planning & Synthesis, Personas, Journey Mapping, Contextual Inquiry, Survey Design, Heuristic Evaluation

Systems & Front-End: Design Systems, Component Libraries, Style Guides, Accessibility (WCAG 2.1), Responsive Design, Front-End Development (HTML, CSS, JavaScript)

Tools: Figma, Adobe Creative Suite, Cursor, Maze, UserTesting, Dovetail, Miro, Notion
