

Jasmine Sayed

Product Designer

Seattle, WA | (925) 964-0587 | sayedjasmine@gmail.com | linkedin.com/in/sayedjasmine | jasminesayedportfolio.com

Product designer for complex AI and accessibility products who runs the research, designs end to end, and builds in code. From a climate-tech investor site to an 11,000-model AI platform with Microsoft CoreAI, I ground decisions in research and partner closely with product and engineering. *Foundry adopted both of my recommendations; they are live today · open to relocation.*

EXPERIENCE

UX Designer & Researcher, Microsoft

Jan 2026 – Jun 2026

Sponsored graduate project with Microsoft CoreAI (Foundry) · University of Washington HCDE · Redmond, WA

- On a five-designer team, redesigned model discovery for Microsoft Foundry's 11,000+ model catalog, driving concept through execution: region filtering and a side-by-side compare tray that cut search-to-select time ~58% in round-two usability testing; the team adopted both and they are live in the product today.
- Led usability research on Foundry's Agent Builder across 8 moderated sessions, where all 8 participants hit the same Severity-4 blocker; that finding, plus 5 ranked issues, reprioritized the team's roadmap.
- Built the Figma components and annotated specs for the region-filter and compare flows, documenting states and behavior so PMs and engineers could pick them up without a translation step.

Design & Operations Associate, University of Washington Children's Center

Sep 2025 – Present

Part-time · Seattle, WA

- Build and maintain the center's Figma design system (type scale, color, reusable components) and produce weekly newsletters, flyers, and campaign posters, keeping turnaround fast and everything on-brand.

AI Product Design Intern, DevSpot

Jun 2025 – Sep 2025

Internship

- Designed a 1:1 and group messaging feature, working out threading and timestamp hierarchy through think-aloud testing before engineering handoff.
- Audited and rebuilt DevSpot's design system, annotating each component inline (sizes, states, variables) so engineers could ship straight from Figma without clarification meetings.

UX Designer, Iter8 Design Lab

Mar 2023 – Jun 2025

Contract

- Delivered 15+ prototypes across 8 client engagements (including AWS and Conspire Commerce), spanning enterprise, e-commerce, gaming, and nonprofit.
- On a five-designer team, restructured Nexstera Tech's investor site (climate-tech startup) from one overloaded page into focused, story-driven flows; investor bounce fell 34% and meeting requests tripled in the first quarter.

KEY PROJECTS

Nox+ — Privacy-First Identity Verification

Project Lead

- Led a 4-person team through mixed-methods research (survey n=96, 16 interviews, 2 contextual inquiries), then designed a redaction-first verification flow that lifted task success from 63% to 94% (SUS 86, n=8).

Saksham — Inclusive EdTech for Neurodivergent Learners

Sole Designer, Researcher & Developer

- Designed, built, and coded (HTML/CSS/JavaScript) a live, accessible reading library for neurodivergent learners (guided reading, offline mode, dyslexia-friendly fonts) for a gap affecting 5M+ children in India; field-tested in a classroom and published in the TAGA 2026 Journal.

LEADERSHIP & ACTIVITIES

- President, UXFest SLO** — Led Cal Poly's UX hackathon (140+ participants) and managed 50 members across events, design, multimedia, finance, and marketing.
- UX/UI Designer, Hack4Impact** — Designed 2 full-stack nonprofit apps (GoSee Foundation, Central Coast Coalition) with engineers and PMs.
- 1st Place, Figma Make Hackathon** — Best Game Mechanics (2025).

EDUCATION

M.S., Human Centered Design & Engineering — University of Washington · GPA 3.9

Sep 2025 – Jun 2027 (Expected)

B.S., Graphic Communication (UX/UI Design) — Cal Poly, San Luis Obispo · GPA 3.5

Sep 2022 – Jun 2025

SKILLS

UX Design: End-to-End UX, Interaction Design, Information Architecture, Wireframing, User Flows, Prototyping, Visual Design

Research & Testing: Usability Testing, User Interviews, Research Planning & Synthesis, Personas, Journey Mapping, Contextual Inquiry, Survey Design, Heuristic Evaluation

Systems & Accessibility: Design Systems, Component Libraries, Style Guides, Accessibility (WCAG 2.1), Responsive Design, Implementation-Ready Specs

Tools: Figma, Adobe Creative Suite, Maze, UserTesting, Dovetail, Miro, Notion, HTML/CSS
